

**TOWNSHIP OF VERONA
COUNTY OF ESSEX, STATE OF NEW JERSEY**

RESOLUTION No. 2024-057

A motion was made by Councilman Roman; seconded by Mayor Tamburro that the following resolution be adopted:

**DECLARING BLOOMFIELD AVENUE AS AN AREA IN NEED OF
REHABILITATION**

WHEREAS, the Local Redevelopment and Housing Law, N.J.S.A. 40A:12A-1, et seq. (the "Redevelopment Law") provides a mechanism to empower and assist local governments to promote the advancement of community interests through programs of redevelopment for the expansion and improvement of commercial, industrial, residential, and civic facilities; and

WHEREAS, the Redevelopment Law empowers the Township of Verona ("Township"), by and through its Township Council (the "Governing Body"), to delineate an area within the Township as an area in need of rehabilitation if the area qualifies under one of the criteria enumerated under N.J.S.A. 40A:12A-14; and

WHEREAS, Township Manager directed the Township's planning firm, H2M Associates, Inc. ("H2M"), to conduct a preliminary investigation to determine if the Bloomfield Avenue corridor ("Study Area"), as described in the attached boundary map, and which is generally bounded by Sunset Avenue to the east, White Rock Road to the west and an irregular boundary along properties fronting on Bloomfield Avenue, qualifies as an area in need of rehabilitation pursuant to N.J.S.A. 40A-12A-14; and

WHEREAS, H2M's findings, presented in a report entitled "Area in Need of Rehabilitation Study Bloomfield Avenue Corridor" dated February 14, 2024, attached herewith as Exhibit A ("H2M Report"); and

WHEREAS, the H2M report concludes that because (a) more than half of the housing stock were built before 1974 and, therefore, are at least 50 years old and (b) a majority of the water and sewer infrastructure in the delineated area is at least 50 years old and is in need of repair or substantial maintenance, the Study Area qualifies as an area in need of rehabilitation under the Redevelopment Law; and

WHEREAS, the Governing Body desires to refer the Study Report and the draft Resolution to the Planning Board for review and comment.

NOW, THEREFORE, BE IT RESOLVED by the Township Council of the Township of Verona, County of Essex, and State of New Jersey, that the Township Clerk is directed to forward H2M's findings, presented in a report entitled "Area in Need of Rehabilitation Study Bloomfield Avenue Corridor" dated February 14, 2024, attached herewith as Exhibit A ("H2M Report") and a draft copy of the draft Resolution that the Council plans on considering to the Planning Board for review and comment.

ROLL CALL:

AYES: Holland, McGrath, Roman, McEvoy, Tamburro

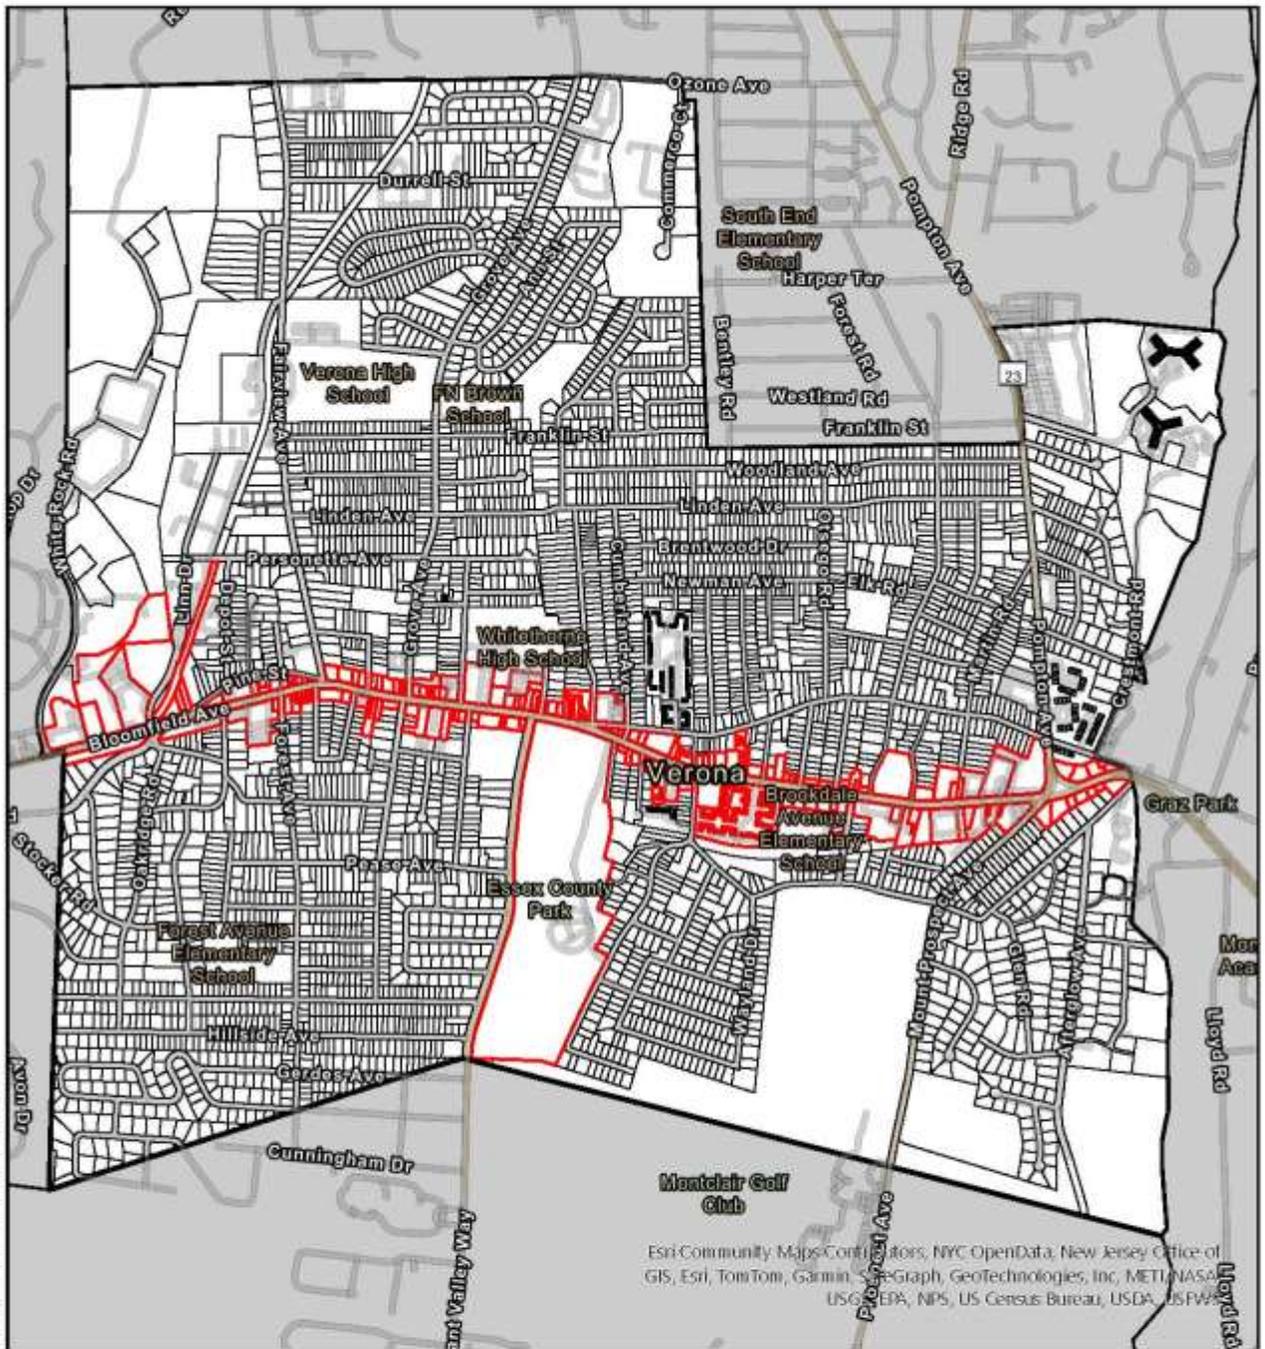

NAYS:

THIS IS TO CERTIFY THAT THE FOREGOING IS A TRUE AND EXACT COPY OF A RESOLUTION ADOPTED BY THE TOWNSHIP COUNCIL OF THE TOWNSHIP OF VERONA AT A REGULAR MEETING HELD ON MARCH 11, 2024.

JENNIFER KIERNAN
MUNICIPAL CLERK

I. Introduction

The following study has been prepared at the direction of the Township Manager for the Mayor and Council of the Township of Verona. The study determines whether the Bloomfield Avenue corridor qualifies as an “area in need of rehabilitation” in accordance with the New Jersey Local Redevelopment and Housing Law (LRHL) set forth within N.J.S.A. 40A:12A-1 et. seq. The boundary map depicting the rehabilitation study area is included herewith in **Appendix A**. It should be noted that the 2022 Master Plan identified Bloomfield Avenue as an area recommended for change. More specifically, the Land Use Plan Element noted that this corridor could benefit from the rehabilitation designation to incentivize property owners to improve their buildings and create a more vibrant environment that would attract both residents and visitors alike.

This report begins with a brief description of the statutory process, pursuant to LRHL, to help familiarize the reader with the steps involved in the designation of areas in need of rehabilitation and what criteria is utilized to determine if the properties qualify to be designated as areas in need of rehabilitation. Designating an Area in Need of Rehabilitation, pursuant to the LRHL, permits a municipality or redevelopment entity to use all of the powers of redevelopment, except that the power of condemnation or granting long-term tax exemptions are not permitted for properties within the area of rehabilitation. Those two powers are exclusive to properties designated as areas in need of redevelopment. However, should the governing body choose to, it may further direct the Planning Board to conduct investigations to determine whether specific properties within the rehabilitation area meet the redevelopment criteria, pursuant to N.J.S.A. 40A:12A-5.

An analysis of the study area is included, which describes how the study area meets the statutory criteria for designation as “an area in need of rehabilitation” in accordance with the LRHL. Finally, an outline of recommended next steps is included to help guide the Planning Board and Governing Body.

The Local Redevelopment and Housing Law

Areas in Need of Rehabilitation

Rehabilitation, pursuant to N.J.S.A. 40A:12A-3 of the LRHL, is defined as “an undertaking, by means of extensive repair, reconstruction or renovation of existing structures, with or without the introduction of new construction or the enlargement of existing structures, in any area that has been determined to be in need of rehabilitation or redevelopment, to eliminate substandard structural or housing conditions and arrest the deterioration of that area.”

The LRHL enables local governments to initiate a process by which properties that meet certain criteria contained within the statute may be designated as an area in need of rehabilitation. Upon designation as an area in need of rehabilitation, municipalities then have the option of adopting a redevelopment plan for all or a portion of the designated area. The redevelopment plan establishes specific and detailed development standards reflecting community desires for improvement of the area. Designation of an area in need of rehabilitation also permits a municipality to utilize the powers contained within the Five-Year Tax Exemption and Abatement Law to promote the construction and rehabilitation of structures within the area.

The LRHL specifies the process which must be followed in designating a rehabilitation area. A summary of that process is as follows:

Table 1	
Responsible Party	Designating an Area in Need of Rehabilitation
Governing Body	The Governing Body prepares a proposed resolution with any supporting report attached, which would declare identified properties as an area in need of rehabilitation and refers that proposed resolution and any report attached to the Planning Board for its review.
Planning Board	Within 45 days of the receipt of the proposed resolution, the Planning Board submits its recommendations, including any modifications recommended, to the governing body for its consideration. The Governing Body is not bound by the Planning Board’s recommendations and may adopt the resolution with or without modifications. If the Planning Board does not submit recommendations within 45 days, the Governing Body may adopt the resolution with or without modification.
Governing Body	The Governing Body adopts the proposed resolution, with or without modification, designating the proposed area as an area in need of rehabilitation.

Statutory Criteria

A delineated area may be determined to be in need of rehabilitation if the governing body of the municipality determines by resolution that a program of rehabilitation, as defined in section 3 of P.L.1992, c.79 (C.40A:12A-3), may be expected to prevent further deterioration and promote the overall development of the community. Section 14 of the LRHL lists criteria which are used to determine if properties can be designated as an area in need of rehabilitation. At least one of the conditions described in the criteria must be present. The criteria are as follows:

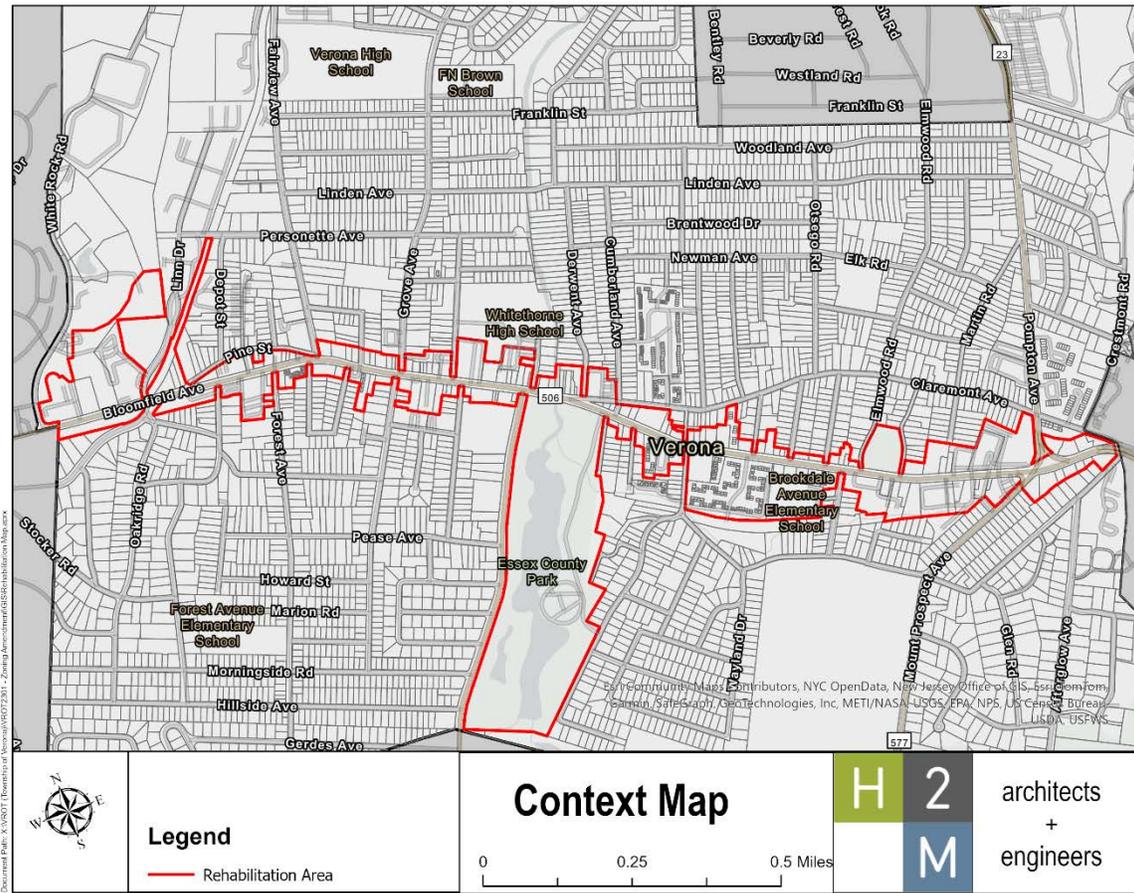

Table 2	
Criteria Identification	Description
1	A significant portion of structures therein are in a deteriorated or substandard condition.
2	More than half of the housing stock in the delineated area is at least 50 years old.
3	There is a pattern of vacancy, abandonment or underutilization of properties in the area.
4	There is a persistent arrearage of property tax payments on properties in the area.
5	Environmental contamination is discouraging improvements and investment in properties in the area.
6	A majority of the water and sewer infrastructure in the delineated area is at least 50 years old and is in need of repair or substantial maintenance

Furthermore, Section 14 states “where warranted by consideration of the overall conditions and requirements of the community, a finding of need for rehabilitation may extend to the entire area of a municipality.”

II. Study Area

The Study Area includes parcels along the entirety of Bloomfield Avenue corridor in the Township of Verona. Bloomfield Avenue traverses approximately 1.85 miles through Verona, in an east west direction, connecting the Borough of Caldwell with the Township of Montclair. The area is generally bound by Sunset Avenue to the east, White Rock Road to the west, and an irregular boundary along the properties fronting on Bloomfield Avenue. The Study Area encompassing an area of approximately 142 acres, including Verona Park, is eight (8%) percent of the Township. It includes approximately 160 parcels within 37 blocks as indicated in **Figure 1**, below.

Figure 1: Study Area Boundary Map

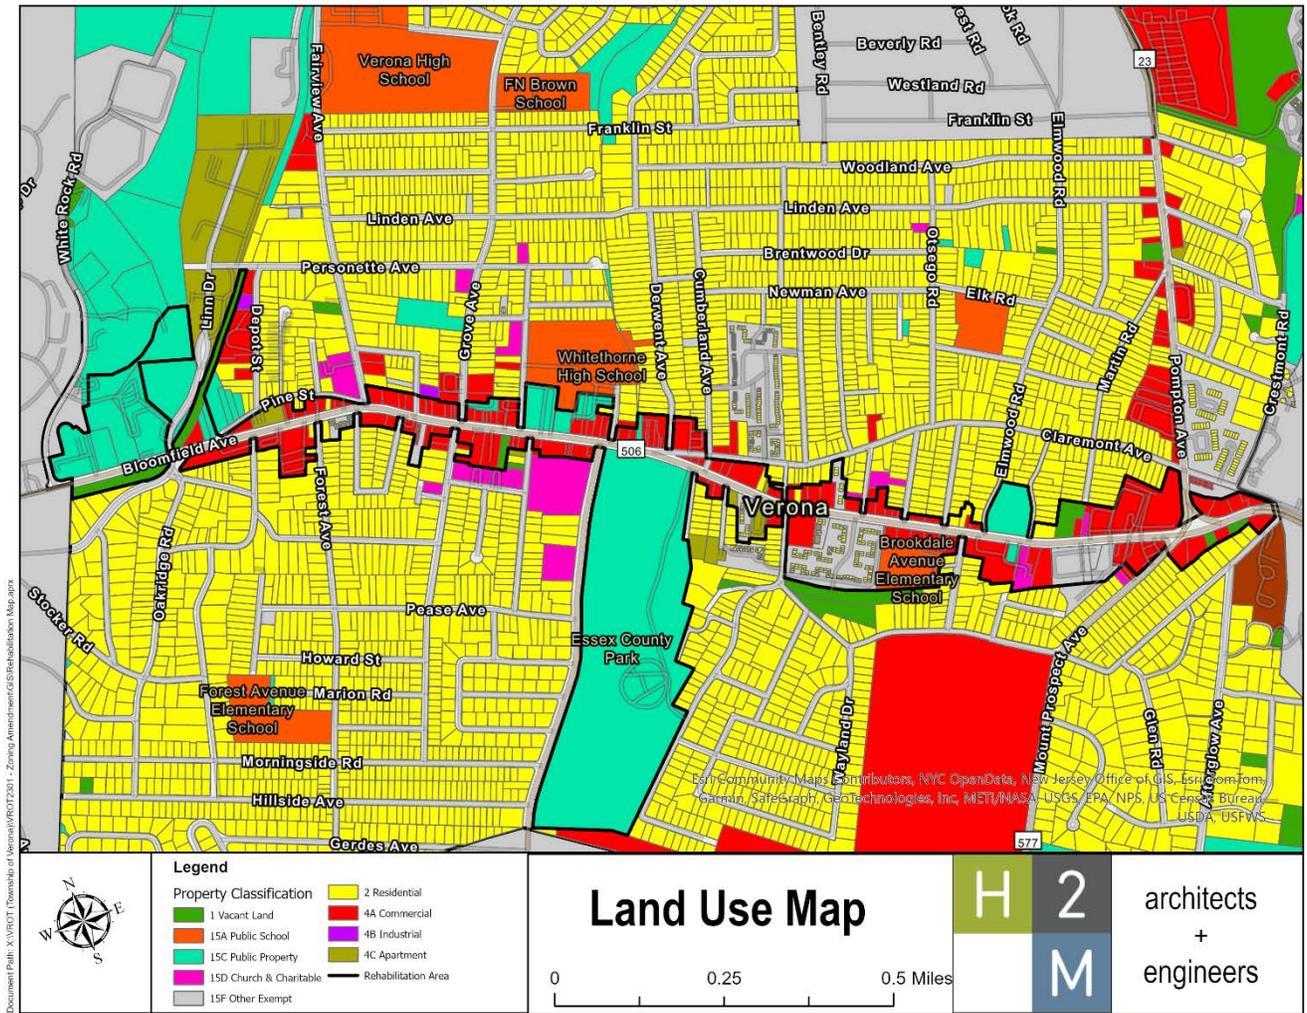

Land Use

The Township is a predominantly residential suburban town with commercial uses concentrated along Bloomfield Avenue and Pompton Avenue. The land uses along Bloomfield Avenue are varied, commercial, residential, apartments, public property, church and charitable, and vacant land. As seen in **Figure 2, Land Use Map**, the majority of the land uses are designated as commercial while there is a significant amount designated as residential. There are few properties designated as apartments, public property, church and charitable, and vacant land uses.

Area in Need of Rehabilitation Study
 Bloomfield Avenue Corridor, Verona, NJ

Figure 2: Land Use Map

Existing Zoning

The Study Area spans seven (7) zone districts as depicted in **Figure 3, Zoning Map**. These zone districts are as follows:

- ETC – Extended Town Center
- C-2 – Professional Office and Retail
- TC – Town Center
- A-1 – Multifamily Residential Low-Rise
- A-3 – Residential Townhouse
- MR – Mixed Retail
- P – Public

As mentioned in the prior section, Bloomfield Avenue is predominantly a commercial corridor with some residential uses. The corridor also includes Verona Park, which is zoned P. The ETC, C-2, and TC Zone District conditionally permit mixed use buildings.

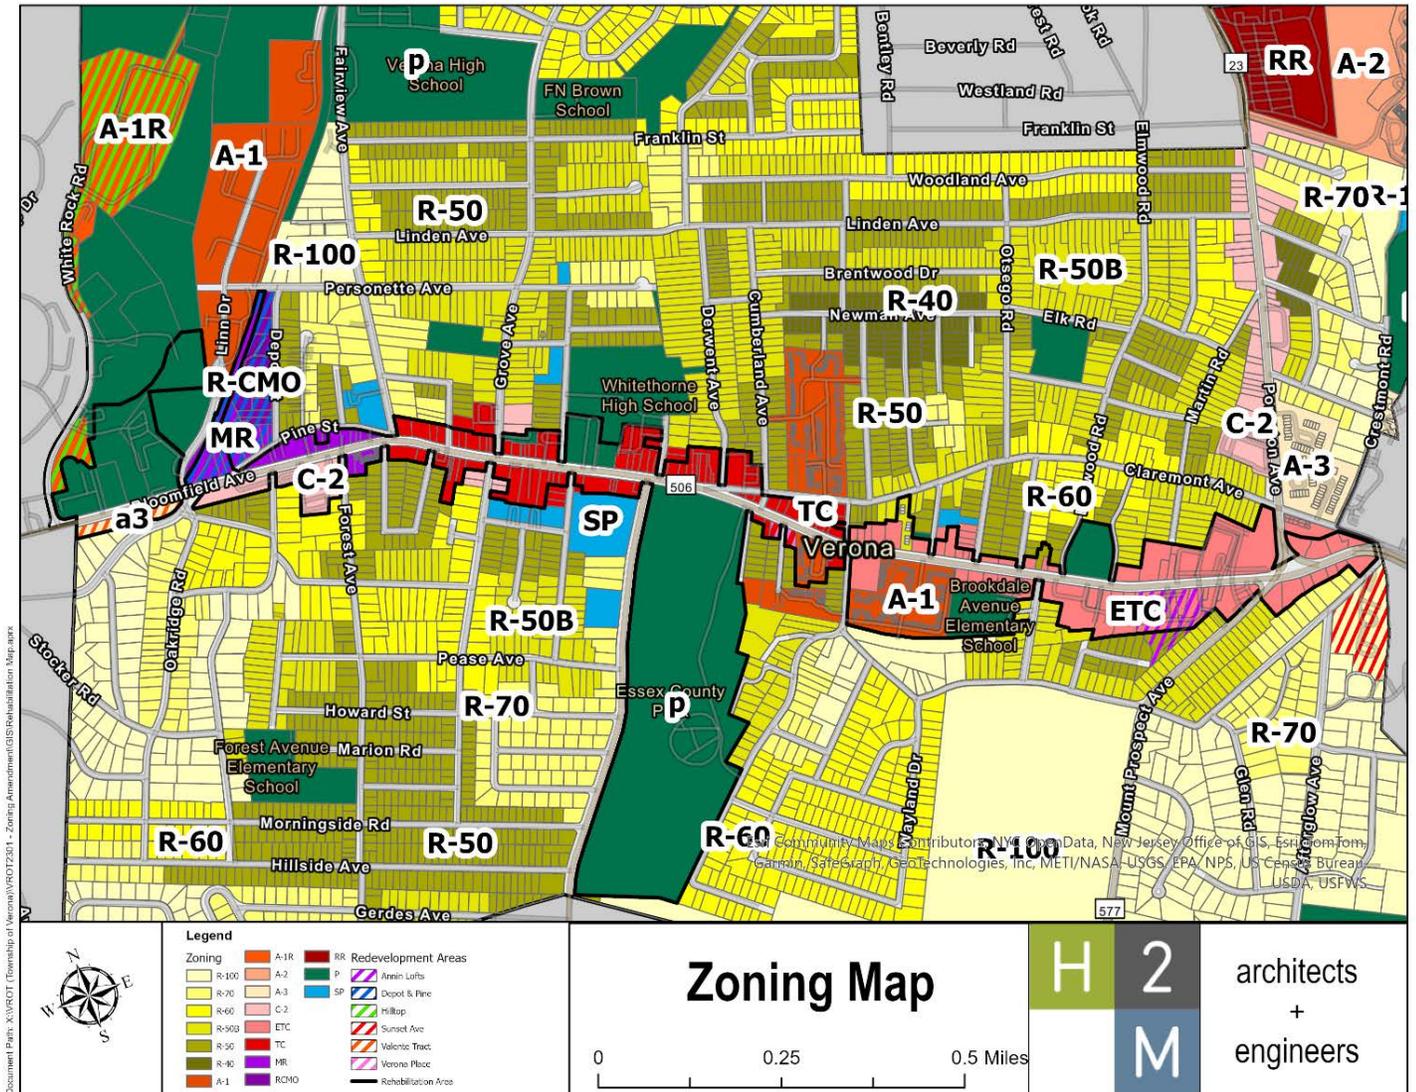

The C-2 (Professional Office and Business) Zone District permits commercial and professional offices, commercial schools of dance, music, fine art and similar pursuits, and family day-care centers as principal uses. Accessory uses include those that are customarily incidental to the principal or conditional use. Conditional uses include mixed residential and professional or commercial nonmedical office use, and mixed nonmedical professional and nonmedical commercial office uses. The minimum lot size in the C-2 Zone District is 15,000 square feet.

The TC (Town Center) Zone District principally permits retail stores and retail service establishments, food establishments, banks, and other financial institutions (not including drive through uses), theaters, family day-care centers, and personal service establishments. Mixed-use developments that are conditionally permitted include mixed residential and retail, mixed retail and commercial, mixed retail and professional office. Accessory uses include uses customarily incidental to the principal or conditional use, outdoor restaurant seating, and sidewalk cafes. Minimum lot sizes are 2,000 square feet.

The ETC (Extended Town Center) Zone District permits a variety of food establishments in addition to retail stores and retail service establishments. Additionally, the Zone District permits commercial and professional offices, wholesale trade, and personal service establishments. The ETC district conditionally permits the same mixed-use developments as the TC District. Other conditional uses permitted in this district are automobile sales and service stations and massage parlors. The ETC zone differs from the TC zone with more stringent bulk regulations that result in less dense developments compared to the TC zone.

The MR Zone District principally permits the following uses: single-family dwellings, nonmedical professional and commercial offices, and retail. This district also conditionally permits a variety of mixed uses such as mixed residential and retail; mixed residential and nonmedical commercial offices; mixed nonmedical commercial and professional offices; mixed residential and nonmedical professional offices; and residential cluster developments.

Figure 3: Zoning Map

III. Study Area Evaluation for Conformance with the Statutory Criteria

Criteria Evaluation for the Study Area

This section of the report considers whether or not the statutory criteria for “an area in need of rehabilitation” designation is met in the Study Area. To that end, the following steps are required to be undertaken:

1. The first step would be to obtain evidence of substandard or deteriorated buildings or a pattern of vacancy and abandonment. Evidence of building conditions may be found during a site visit and in the course of conducting exterior surveys, while the vacancy patterns can be obtained through an examination of code-enforcement records. In satisfying this criterion, it is not necessary to show that the deterioration constitutes a threat to the people who live and work in the area. A review of property tax records is useful to determine a pattern of property tax arrearage, as these records identify properties that are in foreclosure or where the tax payments are delinquent in that they have not been made for more than a year. It is quite likely that the property owners may be paying taxes and continuing to minimally maintain the property, but the area may still be in need of rehabilitation. Therefore, the following section outlines other qualifying criteria.
2. In the alternative, one could review the housing stock to make a determination of how many parcels of lots contain houses that were built after 1974 and prior to 1974 or if the majority of the existing water and sewer infrastructure is at least 50 years old and is in need of repair or substantial maintenance. The age of the housing stock may be documented through the United States Census Bureau housing data, broken down to the Census Tract or block group level or through the municipal tax records. Information regarding the age of water and sewer systems may be obtained from the local public and private utilities or the municipal engineer, who can also provide information regarding the need of repair or substantial maintenance of the infrastructure.

In order to conduct the preliminary assessment, tax records were obtained from the Township of Verona Tax Assessor’s office and were reviewed with the current zoning and land use map. This is included herein in **Appendix B**. The Township Engineer was contacted to determine the age of the existing water and sewer infrastructure in order to ascertain if the Township qualifies to be designated as an Area in Need of Rehabilitation based upon the criterion that the majority of the existing water and sewer infrastructure is at least 50 years old and is in need of repair or substantial maintenance.

Criteria #2: Housing Stock

As mentioned earlier in this document, the Study Area includes the Bloomfield Avenue corridor in Verona Township. This section reviews the housing stock along the corridor to make a determination of how many parcels of lots contain houses that were built prior to 1974. Based upon the data provided by the tax assessor there are a total of 475 units on properties along Bloomfield Avenue classified as Vacant – Class 1; Residential – Class 2; Commercial – Class 4A; Apartments – Class 4C; Public School Property – Class 15A; Public Property – Class 15C; Church and Charitable Property – Class 15D; and Other Exempt – Class 15F. Units classified as Class 2 and Class 4C were gleaned from the total list to analyze the age of the housing stock. The data identified a Class 15D property containing a single-family use, which was included in the analysis as well. Housing stock is defined as the total number of houses and apartments in an area¹.

¹ <https://www.merriam-webster.com/dictionary>; accessed on February 12, 2024

Therefore, a total of 329 housing units were reviewed to ascertain the age of the housing stock in the study area.

As shown in Table 3, below, 279 out of the total 329 housing units were constructed more than 50 years ago or prior to 1974. In this category, the year-built ranges from 1884 up to 1969. The remaining housing units were built after 1974, starting from 1979 with the latest development constructed in 2017. Therefore, 85% of the housing units were constructed more than 50 years ago and the remaining 15% of the housing units are less than 50 years old.

Table 3				
Age	Apartments (5+)	Residential (1- to 2-family)	Total	Percent (%)
Prior to 1974	268	11	279	85%
After 1974	47	3	50	15%
Total	315	14	329	100%

Criteria #6: Sewer and Water Infrastructure

One of the criteria for the designation of an area in need of rehabilitation is the age and condition of the water and sewer infrastructure. As per the Township Engineer, the sanitary sewer lines are over 50 years in age, as portion of the sanitary sewer pump station was constructed in the 1920s. The sewer lines are in need of repair and substantial maintenance in order to avoid more costly repairs in the future. Similarly, the Township Engineer has noted that based upon their research, the watermain for the entire length of Bloomfield Avenue in the Township of Verona was constructed on or before the 1960s and thus is over 50 years old. Similar to the sewer lines, the watermain is in need of substantial maintenance in order to avoid more costly repairs in the future. Correspondence from the Township Engineer is attached herewith in **Appendix C**.

IV. Conclusions and Recommendations

This analysis concludes that the Study Area qualifies as an area in need of rehabilitation under the criteria listed in the LRHL. Specifically, the study area satisfies Criterion 2 in that “more than half of the housing stock in the delineated area is at least 50 years old”. The information provided by the tax assessor concludes a majority (85%) of the housing stock within the Township was built over 50 years ago. The Study Area also satisfies Criterion 6 in that “a majority of the water and sewer infrastructure in the delineated area is at least 50 years old and is in need of repair or substantial maintenance.”

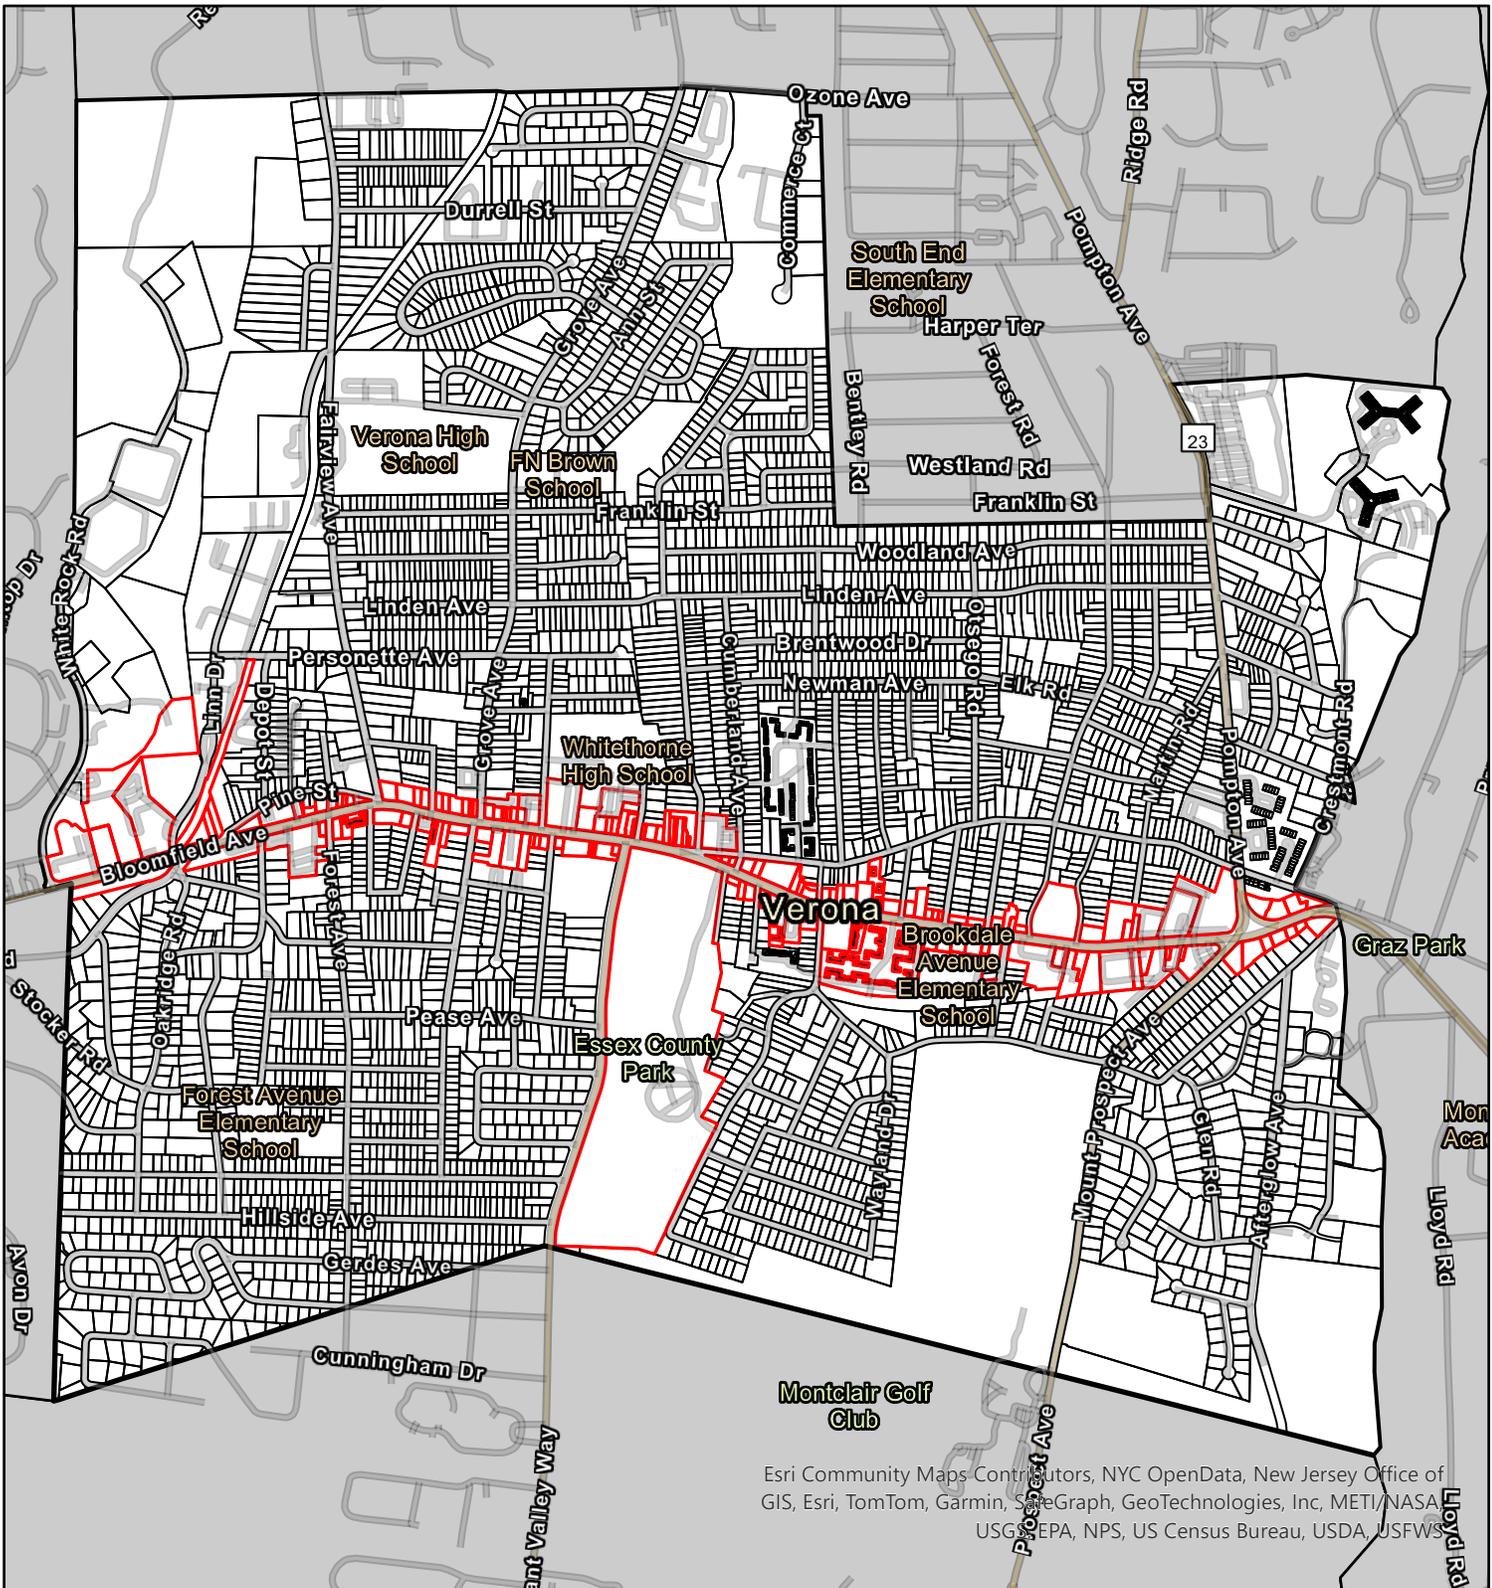

The LRHL allows an area to be designated as an area in need of rehabilitation on the basis of satisfying a single criterion and that satisfying all the six criteria is not required. This report concludes that the study area satisfies two criteria and therefore meets the statutory requirements for designation as an area in need of rehabilitation. It may be expected that the Township could benefit from a program of rehabilitation, as defined in the LRHL, due to the age of housing stock and age and condition of its water and sewer infrastructure.

A determination to designate a rehabilitation area is the first step in the redevelopment process for an area in need of rehabilitation. Next steps may include the drafting and adoption of a redevelopment plan for the area, although this is not mandatory. The Mayor and Council may choose to prepare a redevelopment plan or delegate this task to the Township Planning Board. Any redevelopment plan drafted must be adopted by ordinance and include the required content specified in the LRHL. The Township may also utilize the powers contained within the Five-Year Tax Exemption and Abatement Law in areas in need of rehabilitation without the adoption of a redevelopment plan. The exemptions and abatements permitted under the Five-Year Tax Exemption and Abatement Law may encourage private property owners to rehabilitate and reinvest in their properties. As mentioned earlier in this report, the governing body has the ability to further direct the Planning Board to conduct investigations to determine whether specific properties within the rehabilitation area meet the redevelopment criteria pursuant to N.J.S.A. 40A:12A-5. Should those specific areas or parcels qualify and get designated as redevelopment areas and a redevelopment plan is adopted, then the governing body may grant long term tax abatements to the redeveloper(s) of the designated parcels.

Correspondence from the Township Engineer

January 15, 2024

The Honorable Mayor and Township Committee
Township of Verona
Municipal Building
600 Bloomfield Avenue
Verona, New Jersey 07044

Attention: Kevin O'Sullivan, Deputy Township Manager

Re: Bloomfield Avenue-Area of Rehabilitation
Township of Verona
Essex County, New Jersey
Our File No. VA-155

Dear Mayor and Members of the Committee:

This office has conducted research of the watermain for the entire length of Bloomfield Avenue in the Township of Verona. We have determined that the watermain was constructed on or before the 1960's and is over 50 years in age.

The watermain is in need of substantial maintenance in order to avoid more costly repairs in the future.

Should you require additional information or have any questions, please contact me.

Very truly yours,

BOSWELL ENGINEERING

Peter C. Ten Kate, P.E.

Re: Bloomfield Avenue-Area of Rehabilitation
Township of Verona
Essex County, New Jersey
Our File No. VA-155

Dear Mayor and Members of the Committee:

This office has conducted research of the sanitary sewer mains for the entire length of Bloomfield Avenue in the Township of Verona. We have determined that the sanitary sewer lines constructed are over 50 years in age as a portion of the sanitary sewer pump station was constructed in the 1920's.

The sanitary sewer lines are in need of repair and substantial maintenance in order to avoid more costly repairs in the future.

Should you require additional information or have any questions, please contact me.

Very truly yours,

BOSWELL ENGINEERING

Peter C. Ten Kate, P.E.
