AARP

The U.S. Census Bureau estimates that by 2030, one in five drivers will be age 65 and older.

As drivers mature, natural changes in their bodies can affect their driving ability and safety behind the wheel. Older drivers can adapt to factors that may affect their driving by making individual adjustments to find their best person-to-vehicle fit.

CarFit® is a 15- to 20-minute personal assessment, during which trained technicians will assist you in adjusting your vehicle components for a better fit.
