Township of Verona, NJ

Annual Comment on Verona Township

Issuer Profile

Verona Township is located in Essex County in northeastern New Jersey, approximately 10 miles northwest of Newark. Essex County has a population of 795,723 and a population density of 6,305 people per square mile. The county's per capita personal income is \$58,319 (1st quartile) and the August 2016 unemployment rate was 6.6% (4th quartile).² The largest industry sectors that drive the local economy are health services, local government, and professional/scientific/technical services.

Credit Overview

Verona Township's credit position is very high quality, and its Aa2 rating is slightly above the median rating of Aa3 for US cities. Key credit factors include a sizable tax base with an exceptionally strong socioeconomic profile, a robust financial position, and a light debt burden with a somewhat elevated pension liability.

Economy and Tax Base: The economy and tax base of the township are very healthy, which are slightly favorable with respect to the assigned rating of Aa2. The median family income is a robust 208.9% of the US level. Furthermore, the full value per capita (\$169,616) is materially above other Moody's-rated cities nationwide. Lastly, the total full value (\$2.3 billion) is slightly stronger than the US median and grew modestly from 2012 to 2015.

Finances: The financial position of the township is very healthy, which is a modest credit strength when compared with its Aa2 rating. The net cash balance as a percent of revenues (38.5%) is consistent with the US median and rose slightly between 2012 and 2015. In addition, the available fund balance as a percent of operating revenues (26.1%) falls just short of other Moody's-rated cities nationwide. Moody's makes certain adjustments to New Jersey local governments' fund balances to include receivables and reserves that would be eligible to be included in fund balance under GAAP accounting but are excluded as a result of state statutory accounting regulations.

Debt and Pensions: The township has moderate debt and pension liabilities, which are unfavorable in comparison to its Aa2 rating. The net direct debt to full value (1.7%) is slightly higher than the US median. In addition, the Moody's-adjusted net pension liability to operating revenues (1.8x) is slightly above the US median, and this metric rose from 2012 to 2015.

Management and Governance: Balanced financial operations are a component of good financial management. On average, Verona Township approximately broke even over the past several years.

New Jersey cities have an institutional framework score ³ of "Aa," or strong. Revenues are moderately predictable and mostly consist of property taxes; however, cities are required to make county and school district tax levies whole in the event of tax appeals. Revenue-raising ability is moderate as cities are constrained by a 2% cap on the property tax levy. Cities can raise the levy above the cap for debt service, pensions and certain qualified expenses. Expenditures, which primarily consist of personnel and public safety, are highly predictable given a 2% arbitration award cap for disputes with police and fire employees. Cities have a moderate ability to adjust costs given the presence of collective bargaining and high fixed costs.

Sector Trends - New Jersey Cities

New Jersey cities remain stable given improved financial management practices and highly predictable expenditures under the state-wide arbitration award cap. Most cities have implemented more frequent revaluation processes that limit tax appeals and an improving housing market reduces the risk in the first place. While the expanding state economy lags the nation, regions within close proximity of New York City will continue to benefit from the spill-over effect of residential and commercial development. Large cities with weak economic profiles and a high dependence on state aid remain vulnerable.

Endnotes

- 1 The rating referenced in this report is the government's General Obligation (GO) rating or its highest public rating that is GO-related. A GO bond is generally a security backed by the full faith and credit pledge and total taxing power of the local government. See [Local Government GO Pledges Vary Across States](#), for more details. GO-related ratings include issuer ratings, which are GO-equivalent ratings for governments that do not issue GO debt. GO-related ratings also include ratings on other securities that are notched or otherwise related to what the government's GO rating would be, such as annual appropriation, lease revenue, non-ad valorem, and moral obligation debt. The referenced ratings reflect the government's underlying credit quality without regard to state guarantee or enhancement programs or bond insurance.
- 2 The per capita personal income data and unemployment data for all counties in the US census are allocated to quartiles. The quartiles are ordered from strongest-to-weakest from a credit perspective: the highest per capita personal income quartile is first quartile, and the lowest unemployment rate is first quartile. The first quartile consists of the top 25% of observations in the dataset, the second quartile consists of the next 25%, and so on. The median per capita personal income for US counties is \$46,049 for 2014. The median unemployment rate for US counties is 4.9% for August 2016.
- 3 The institutional framework score measures a municipality's legal ability to match revenues with expenditures based on its constitutionally and legislatively conferred powers and responsibilities. See [US Local Government General Obligation Debt \(January 2014\)](#) for more details.
- 4 For definitions of the metrics in the Key Indicators Table, [US Local Government General Obligation Methodology and Scorecard User Guide \(July 2014\)](#). The population figure used in the Full Value Per Capita ratio is the most recently available, most often sourced from either the US Census or the American Community Survey. Similarly, the Median Family Income data reported as of 2012 and later is always the most recently available data and is sourced from the American Community Survey. The Median Family Income data prior to 2012 is sourced from the 2010 US Census. The Full Value figure used in the Net Direct Debt and Moody's-adjusted Net Pension Liability (3-year average ANPL) ratios is matched to the same year as audited financial data, or if not available, lags by one or two years. Certain state-specific rules also apply to Full Value. For example, in California and Washington, assessed value is the best available proxy for Full Value. Certain state specific rules also apply to individual data points and ratios. Moody's makes adjustments to New Jersey local governments' reported financial statements to make it more comparable to GAAP. Additionally, Moody's ANPLs reflect analyst adjustments, if any, for pension contribution support from non-operating funds and self-supporting enterprises. Many local government pension liabilities are associated with its participation in the statewide multiple-employer cost-sharing plans. Metrics represented as N/A indicate the data were not available at the time of publication.
- 5 The medians come from our most recently published local government medians report, [Medians – Growing Tax Bases and Stable Fund Balances Support Sector's Stability \(March 2016\)](#). The medians conform to our US Local Government General Obligation Debt rating methodology published in January 2014. As such, the medians presented here are based on the key metrics outlined in the methodology and the associated scorecard. The appendix of this report provides additional metrics broken out by sector, rating category, and population. We use data from a variety of sources to calculate the medians, many of which have differing reporting schedules. Whenever possible, we calculated these medians using available data for fiscal year 2014. However, there are some exceptions. Population data is based on the 2010 Census and Median Family Income is derived from the 2012 American Community Survey. Medians for some rating levels are based on relatively small sample sizes. These medians, therefore, may be subject to potentially substantial year-over-year variation. Our ratings reflect our forward looking opinion derived from forecasts of financial performance and qualitative factors, as opposed to strictly historical quantitative data used for the medians. Our expectation of future performance combined with the relative importance of certain metrics on individual local government ratings account for the range of values that can be found within each rating category. Median data for prior years published in this report may not match last year's publication due to data refinement and changes in the sample sets used, as well as rating changes, initial ratings, and rating withdrawals.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for appraisal and rating services rendered by it fees ranging from \$1,500 to approximately \$2,500,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody's.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
