

Important COVID-19 Vaccine Information

Essex County Executive Joseph N. DiVincenzo, Jr. • Essex County Sheriff Armando Fontoura
Essex County Board of Commissioners

“Together, with Governor Murphy & Health Commissioner Judy Persichilli, we’re working to defeat the coronavirus pandemic. Since March, Essex County has provided robust testing, emergency food distribution, financial assistance and more to residents. As vaccines roll out, we’re putting Essex County’s health first by setting up a first-class vaccine distribution program. I urge all residents to wear a mask, keep social distance, wash hands and get a safe, effective vaccine.”

Joseph N. DiVincenzo, Jr. • Essex County Executive

VACCINE TIMELINE

The first doses of the COVID-19 vaccine will be available on or about December 26th in limited quantities. They will be administered according to the NJ State Department of Health’s guidelines in the following order:

- **Frontline healthcare workers** (those who are regularly directly exposed to coronavirus) will be the first to receive the vaccine.
- **As more doses become available, other critical populations will then receive vaccinations** including, but not limited to, those living in group settings, high-risk adults, first responders, funeral home workers, education and child care workers, and other essential frontline workers.
- **After critical populations are vaccinated, vaccinations will be available for the general public.**

VACCINE APPOINTMENTS & INFORMATION

- **To schedule a vaccine, you must make an appointment by calling 973-877-8456 or by visiting EssexCOVID.org.**
- **Appointments are subject to availability of the vaccine.** We will provide regular updates on vaccine availability status on EssexCOVID.org.
- **The vaccine requires two doses. When you sign-up, you will receive two appointments. It is critical that you attend both appointments.**
- **Residents will be asked to provide their medical insurance information and their insurance provider will be billed. If a resident does not have insurance, the cost of the vaccine will be covered by the Health Resources and Services Administration’s Provider Relief Fund. There will be no out-of-pocket expenses charged to residents.**
