

Construction of upgrades and improvements to the Linn Drive Well Facility, located in Verona Township, with a contract amount of \$1,711,000.00, were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits including the removal of PFOA, arsenic, and other PFAS compounds for compliance with NJDEP drinking water standards that will allow the Linn Drive Well to be brought back in service for residents and businesses in Verona Township.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
